

LVT Flooring

Cleaning after Installation

Wait until adhesive fully cures before mopping or moving furniture back into the room. Consult your installer for curing time.

Avoid dragging heavy furniture across the floor, lift, not drag.

Apply protective pads to the bottom of chair legs, tables, etc.

Use castor cups on heavy furniture to protect against indentations.

Ensure entrance mats are non-rubber backed to prevent discoloration.

Routine Cleaning and Care

Sweep floor to remove grit and dirt.

Steam cleaners are not suitable for LVT.

Mop with a pH neutral, fragrance-free cleaner suitable for vinyl flooring. Avoid using bleach-based detergents, as these can cause discoloration. Use a well wrung out mop, do not soak the floor.

Mop up spills as soon as possible using cleaner as above.
